AMENDMENT OF DRAWINGS

Dear Examiner Wilbert L. Starks,

on 12.Oct.2004 I told on the phone, that I'd like to delete the point „d) *backing up the current values of the processors registers*,” out of claim 1.

I mused <*backing up of the processors registers for the further use of the operation system after termination of my procedure*> (which would not be necessary) and their *saving_for_comparison after execution of the Number_as_OpCode* (which is necessary).

I was confused; there's no mistake in Claim 1; Point d) is necessary and should not be deleted.

But I've found a little mistake in the drawings which I want to correct:

On top of drawings-page 3, Fig.4a = table OIT, in the first row and the last column
"Calculation_BitCode" has to be changed to "**Operation_BitCode**",
and one box unter it (second row and last column)

"2^Calculation_ID" has to be changed to "**2^Operation_ID**".

And on top of drawings-page 5, Fig.5 = table ORT, in the last row and the last column
"CIT" has to be changed to "**OIT**".

With friendly greetings

Gerd Krämer
